DETAILED ACTION

1. Claims 1-5 have been cancelled.
2. Claims 6-10 have been added.
3. Claims 6-10 are pending.

Response to Arguments

4. Applicant's arguments filed 12 December 2005 have been fully considered and they are persuasive.

Allowable Subject Matter

5. **Claims 6-10** are allowed.
6. The following is an examiner's statement of reasons for allowance: The present invention is directed toward a login authentication system allowing a user to securely use a business system and a commercial service system, enabling concurrent utilization of one account by multiple people. Each independent claim identifies the uniquely distinct feature **"the commercial service system including financial information configured on the basis of the passwords sent from the business system, whereby the financial information includes a plurality of passwords different from each other to permit use of information in one account by a plurality of the users"**. The closest prior art, Kung (US Patent No. 5,241,594) discloses a method and apparatus for multiple one-time logons within a distributed computing system, wherein the users do not use the same sensitive information at the same time, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Art Unit: 2137

The closest prior art, Lamport (Password Authentication with Insecure Communication), discloses a one-way function to encode passwords for multiple users, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.
